

QR What????

What is all this buzz about a QR Code anyway? The next few slides should solve this mystery for you!

You might be wondering, "*what does QR stand for in QR code?*" To answer you directly, QR code stands for a Quick Response code.

**So, how do you use
a QR code with the
Camera app on
your device?**

Step #1:

Open your camera on your iPhone or other mobile phone/device.

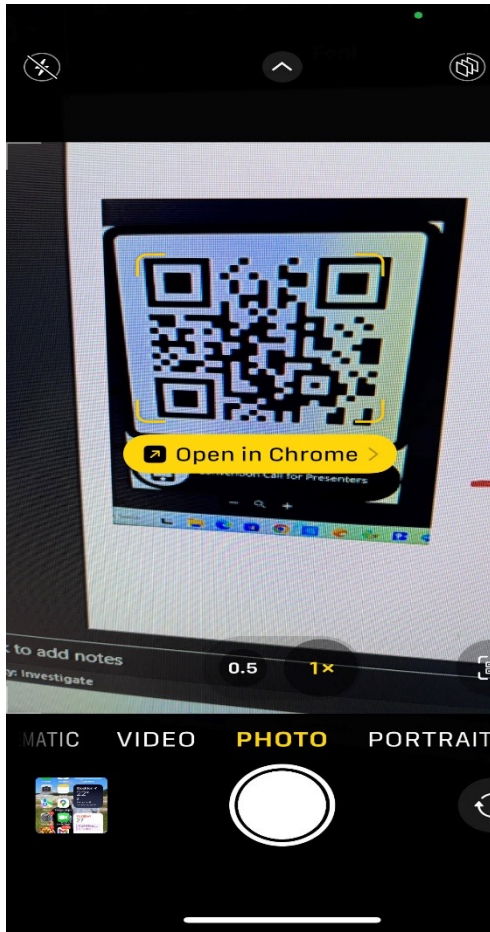

Step #2:

Hover your device over the QR code.
(Hold your device over the code until it reacts.)

**Your device now
recognizes the
QR code and will
give you a link.**

Your device
will show a
notification
for you to find
your link.

Step # 3:

**Tap the
notification to
open the link
that has been
given to the QR
code.**

Step #4:

**Now, you can print or fill
out the form that is
connected to the QR
code.**

Step #5:

**Complete
the form
and submit.**

**Congratulations! You
are now able to use
the QR code method
in any situation that
requires such
technology!**
