CALL FOR PRESENTATIONS

LAMBDA STATE Taming Technology for Innovative Learning

The 2017 Technology Seminar will be held at Bradley University June 19 - 21, 2017 with sessions for beginners as well as experienced technology users. Sessions will include using technology in the classroom, and a new feature will be learning from our students. The Workshops on Monday, June 19th from 1-4 p.m. will be for those who are new to computer technology—*Gaining Confidence with Technology*, as well as using technology to create a *Genealogy Photo Album*. A Wine and Dine reception will be held the evening of Monday, June 19, 2017, 5:00-7:30 p.m. to foster the spirit of the Seminar.

The Opening Session on Tuesday, June 20, 8:30-10:00 a.m. will focus on "*The Latest in Technology*" from the perspective of local classroom teachers and their students. We realize that our students often know and use technology more than we do, so this will be a spotlight on the next generation of users and how they are engaged in Innovative Learning.

Only the Monday workshops will be held in a computer lab. Participants will be expected to bring their own laptops or make arrangements to borrow a laptop for all Tuesday and Wednesday sessions.

Following the Opening Session, two days will be devoted to technology training on June 20 and June 21; the training will consist of two strands designed for beginner and advanced uses. One strand will focus on the Personal Use of Technology; the other on the Instructional Classroom Usage. All sessions will be 1 hour and 30 minutes except the Monday sessions, which will be 3 hours (with a 15 min. break). All proposals are due no later than **September 15**.

Lambda State will be applying for a grant again; receiving the grant will allow us to again provide honoraria for speakers. If you are only attending your session, there will be no charge. Otherwise speakers will be expected to pay the registration cost and attend other sessions.

Please complete the form below and return to Margaret Trybus no later than September 15, 2016. All speakers will be notified of their acceptance and tentative schedule no later than October 1.

Name _____

E-mail contact _____ Phone _____

Title of your presentation _____

Which strand is your session appropriate for: _____ Personal Use of Technology _____ Instructional Classroom Usage

Monday workshops (3hrs):

_____ Beginner training

_____ Advanced Projects

Tuesday/Wednesday workshops (1 hr. 30 min):

_____ Beginner, Personal Usage

_____ Advanced, Personal Usage

_____ Beginner, Instructional Classroom Usage

_____ Advanced, Instructional Classroom Usage

Description of your session (Please describe the level of expertise that participants should have and specifically describe your session)

Please provide a 50 word bio

Please specify the type of equipment that you will require for your session: all classrooms will be mediated with projection capabilities, but HDMI connections and dongles for Macs will have to be arranged for if you do not have your own:

An electronic form can be found on the Lambda State Website www.deltakappagamma.org/IL/

Return no later than September 15, 2016 electronically to: margaretrybus@gmail.com
